

3 jellyfish

3 jellyfish, 3 jellyfish, 3 jellyfish sitting on a rock. One falls off ... ohhh!

Let's talk and do

Encourage your child to colour each jellyfish. You might put out pens or pencils, or children can rip tissue or cut coloured paper and glue this onto the main body. Then cut out each jellyfish. Find something in your home that can be taped to the base edge that will serve as the tentacles, like ribbon, string or tissue paper lengths. As your child creates, ask them questions about their work. Have them count the jellyfish.
